New EZ-DRI™ reticulated foam outdoor cushioning materials...

Outdoor comfort never felt so good-and so dry.

New EZ-DRI polyether-polyurethane outdoor cushions dry almost immediately after exposure to rain, salt spray, melting snow, morning dew, washing, or other forms of moisture and humidity. Large, open pores permit maximum water drainage and air circulation, allowing use quickly after being wet or even saturated. With EZ-DRI outdoor cushioning materials you can offer your customers the best of both worlds – long lasting wear and comfort with extremely fast drying properties.

Consider these advantages for your outdoor recreational cushions – and your customers:

- **SHEDS WATER LIKE A SIEVE**, yet provides the seating comfort of a foam. Large, completely open pores (reticulation) permit rapid draining and maximum air circulation for fast drying.
- **UNIQUE PROPRIETARY FORMULATION** enhances strength and durability for long term exposure to sun and inclement weather.
- **RESISTANT TO MOST CHEMICALS** including most cleaning agents, solvents, alkalies, and acids (bleaching may cause rapid discoloration). Built-in fungicidal additive inhibits fungus, mildew-important for retarding stain and odor.
- **COMPOUND SHAPES FOR UNUSUAL CUSHION DESIGN** may be easily fabricated. EZ-DRI cushions can be shaped the same as conventional foam.
- **RESILIENT, “SPRINGY” CHARACTERISTICS ENHANCE COMFORT**; EZ-DRI cushions may also be lightly over-wrapped with non-woven fiber padding for extra plushness. After wrapping, test cushions to insure proper drainage. Adjust padding density as necessary. Pores should not be blocked with adhesive.

EZ-DRI polyether-polyurethane reticulated foam cushioning materials

TECHNICAL DATA

PARAMETER	VALUE
Density (lbs./cu. ft.)	1.2
Compression (lbs. IFD @ 25%)	38
Comfort factor (65%/25% IFD ratio)	2.2
Ball rebound (5)	42
Tensile strength (lbs./sq. in.)	20
Elongation (%)	240
Tear strength (lbs./in.)	4.0
Compression set (%)	
@ 50% Deflection	13
@ 90% Deflection	25

All testing performed in accordance with ASTM D 3574-91

As with all polyurethane foam cushioning materials, EZ-DRI reticulated foams are subject to fading with exposure to light sources and air.

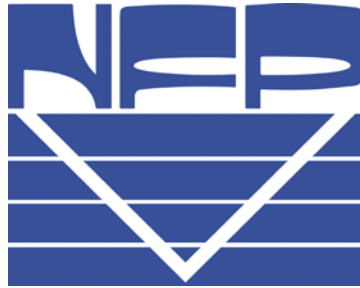

Need applications ideas? We'll help.

The unique properties of EZ-DRI reticulated foam cushioning materials make them ideal for outdoor casual furniture, boats, golf carts and other land and marine recreational vehicles, and many other outdoor seating applications.

How to get more information...

Tell us about your outdoor cushioning requirements. We'll be pleased to provide you with samples and full details or to discuss your application.

PLI-GRIP

Pli-Grip is a continuous strip invisible fastener that is flexible enough to conform smoothly to twists, bends and radical curves without hand sewing. It won't buckle even when twisted and curved at the same time. No more sewing, double welting and gimp tacks. Simply cut off the length you want, when you want it. Pli-Grip has a galvanized satin finish to prevent rusting and staining and is available either in two or three tooth. Comes in regular or heavy.

ONE WAY FASTENERS

This Fastener is a uniquely designed, three-sided locking Snap Fastener. Because of its specifically built-in locking feature, this fastener will withstand extreme pressure on three sides without unlocking, yet will release on the fourth side.

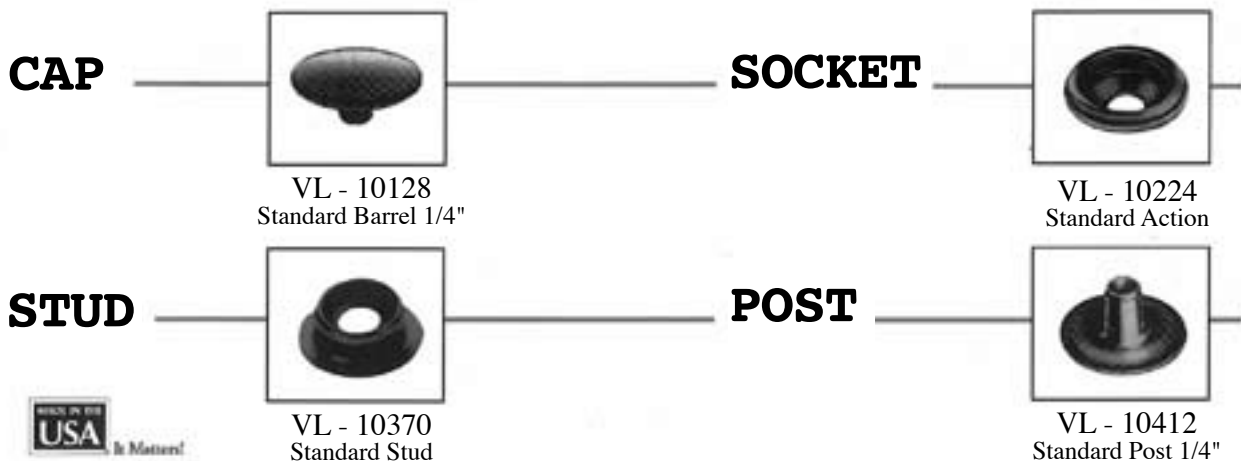

BABY SNAPS

This small size Snap Fastener will provide firm snap holding power without a large aesthetic look on the finished product.
