Kenbri Fire Fighting B.V.

Kenbri Fire Fighting supplies, maintains and rents out everything in the field of professional fire fighting equipment.

With this Kenbri Fire Fighting offers a very wide range of products and services for the (industrial) fire department. At the same time we have a lot of specialized knowledge and experience at our disposal. This unique combination contributes to the distinctiveness of Kenbri Fire Fighting.

The strength of Kenbri Fire Fighting therefore is found in the exclusive dealerships for leading manufacturers for the Dutch market, like a.o: Bronto Skylift, Akron, Kennedy, Angus Fire (a.o. Duraline), Fomtec and Weber Rescue.

We work from our 3 locations with a group of about 90 experienced and motivated employees who understand what fire fighting is about. From our locations in Stellendam and Beveren (Belgium) we focus ourselves mainly on the industrial fire-fighting and incident control. Our sales and production activities for (rescue) vehicles take place from our facility in Waalwijk. At all 3 locations we provide a range of service, modification and inspection activities to among others; vehicles, pumps and hydrants. In case of calamities we offer an 24 hour availability, 7 days a week.

Our well trained employees know that the concept of "quality" is of paramount importance. This does not only reflect in our daily activities, but also in the products and services we provide, maintain or rent out. Kenbri Fire Fighting is ISO9001:2008, AQAP2120:2006 and VCA**2008/5.1 approved.

INTRODUCTION

Kenbri Fire Fighting B.V. ▶ **Core activities**

In addition to supplying and renting out products and services Kenbri Fire Fighting is also strongly focused on its service activities. "Sales, Service and Renting" are the core activities of Kenbri Fire Fighting. These are reflected in the following 3 product groups:

Industrial equipment

A group of specialists is engaged in supplying, maintaining and renting out materials and services for the purpose of the industrial fire-fighting and incident control from our branch in Stellendam. The core assortment of industrial material exists of hydrants, valves, (fire) monitors, tank foam systems, flaps and pumps for applications in extinguishing pipe networks. Part of this is a wide range of water bearing fittings and foam fittings; from hand jet pipes to for example an elevated remote controlled monitor.

Fire fighting equipment

Kenbri Fire Fighting has at its disposal an extensive assortment of fire-fighting material. We provide each kit according to the regulations of Internal Affairs to equip your fire engine or rescue vehicle. If required we will built the materials directly into your vehicle! Kenbri does not only supply and maintain all materials which enable you to work more effective and / or saver, we also rent them out. Everything from a torch to a set of lifting bags or a complete equipment kit for a fire engine or rescue vehicle.

Vehicles

Kenbri Fire Fighting can supply all conceivable fire engines. With its own engineer department and years of expertise Kenbri is the perfect partner for designing and building of customized orders. Everything from a hose vehicle to an industrial combination vehicle.

We also have excellent possibilities for the maintenance or renting of fire engines (with or without operating personnel).

Industrial equipment

The origin of Kenbri Fire Fighting is found in the early 80s with supplying and maintaining of appendages to the (petro) chemical industry. This formed the basis from which Kenbri has gained a lot of specific knowledge and experience in the past 25 years.

Kenbri has an industrial department in the Stellendam branch, from which a group of specialists works on giving advice and supplying materials and services for the purpose of industrial fire-fighting and incident control. Furthermore we are applying our expertise daily in the field of engineering, inspections, approvals and maintenance to extinguishing pipe networks. The development, installing and maintaining of extinguishing installations is one of our specialities. From 2010 this department is also working from the Kenbri branch in Beveren, this is where Kenbri keeps its large stock of foam.

INDUSTRIAL EQUIPMENT

Industrial equipment ▶ Sales

Sales

Our core assortment of industrial equipment exists of hydrants, valves (fire) monitors, tank foam systems, flaps and pumps, etc. for applications in extinguishing pipe networks. In addition we supply a wide range of water bearing fittings and foam fittings; from hand jet pipes to for example an elevated remote controlled monitor. With that we have a variety of foam and powder. The materials advised by us are always of high quality. They are produced by companies with a great track record. In our warehouse in Stellendam we keep large stocks, which reduce our delivery time to a minimum.

For our most important suppliers; Kennedy and Akron Brass, we have exclusive dealership for the Dutch market for many years. Since some years we also have exclusive dealership for Fomtec and Angus Fire, which is worldwide synonymous for fire-fighting materials of the highest quality. In addition to the manufacturing of the Duraline pressure hoses, Angus is also manufacturer of foaming agents, foaming fixtures, mixing systems and fixed extinguishing systems.

In the last few years Kenbri Fire Fighting has developed itself to an organisation which also takes on project assignments, in which we, together with the client, come to a solution in the field of installation and / or engineering. We offer the complete package: risk analyses, fire preventative solutions, incident control, service and maintenance. Whether it concerns foam, pump or monitor systems, we will always find a suitable solution! Using our knowledge and of course the laws and regulations (e.g. PGS, NFPA) in this field, we can contribute to a ready answer.

Service

Kenbri does not only advise, supply and install industrial materials for fire-fighting and incident control; we also take care of the periodic inspections, capacity tests, maintenance and any repairs necessary. Our experienced service technicians periodically certify your hydrants, fire monitors, valves and tank security systems, but also your fire fighting hoses, hand jet pipe nozzles and foam carrying equipment. We can carry out maintenance and repairs on site or in our well-equipped workshop.

Periodic inspections and maintenance are carried out on order, or based on a maintenance and inspection contract. With this contract you are assured to comply with applicable directives, without having to worry about it yourself. This becomes more important with the increasing liability of companies. Moreover, you have a clear picture of the costs.

INDUSTRIAL EQUIPMENT

Industrial equipment ▶ **Rental**

Rental

Kenbri Fire Fighting also rents out industrial materials for short or longer periods to mainly industrial companies and governmental bodies. The professional materials are always in excellent condition and are of course inspected before they leave our premises. In this way you are assured that you are working with reliable materials.

In most cases it is possible to hire the material with qualified operating personnel. Examples are a driver / pump operator, a driver for the extinguish pumps or operating personnel for the safety-units, but also certified technicians for on- and offshore activities and firemen for enforcement services.

The 'supplying' of our operating personnel has a lot of added value. We will only deploy national certified fire fighting personnel, who always have the most relevant experience and the correct papers which are legally requested for the operation of the equipment concerned and for working in an industrial environment.

Fire fighting equipment

Kenbri Fire Fighting supplies an extensive assortment of fire fighting equipment, under which the assortment of Akron (hand-line nozzles) and Angus Fire (Duraline hoses and foam). Under the name Weber Rescue Netherlands we supply and maintain the complete Weber Rescue assortment of hydraulic and pneumatic rescue tools.

We provide each kit according to the demands of our customer to equip your fire engine or rescue vehicle. Due to our large stock we can normally deliver very fast. Moreover, we would like to act on your personal requirements. On request we can deliver adjustment and casing of material to your specifications. When required we can built the materials directly onto your vehicle! In addition we rent out all materials that make it possible for you to work more effective and/or saver. From a torch to a complete equipment kit for a fire engine or rescue vehicle.

FIRE FIGHTING EQUIPMENT

Fire fighting equipment ▶ [Sales](#)

Sales

Kenbri Fire Fighting has many dealerships with leading companies for the Dutch fire-fighting market. We have a complete packet of equipment materials including a clothing range and fire-fighting helmets to our disposal. Kenbri is the exclusive partner in the Netherlands for the American manufacturer Akron Brass Company. The monitors and hand hand-line nozzles from Akron are of the highest level when it comes to quality, product development and innovation. This is reflected in things like reach, spray pattern and capacity.

In recent years we have managed to add some major dealerships to our supply program. These include among others Groupe Leader (fans), Hafenrichter (hose maintenance installations), Argus (TIC's), Fomtec (foam forming agents) and Angus Fire (manufacturer of Duraline pressure hoses, foam forming agents and foaming fixtures).

Under the name Weber Rescue Netherlands we supply the complete assortment of hydraulic and pneumatic rescue equipment from Weber Rescue, which distinguishes itself by innovative technologies, user friendliness and the best possible performance. Weber Rescue Netherlands is also a manufacturer and supplier of a.o. the STABFAST™ stabilization system, STABLOCK and STABPACK stabilization blocks and HYDROREEL hose reels.

Service

We only supply fire fighting equipment from reputable manufacturers, which also guarantees the supply of spare parts for maintenance or repair work. Kenbri has the in-house expertise to carry out these activities.

Weber Rescue Netherlands has its own service department, that is able to maintain, test and certify on-site hydraulic and pneumatic rescue tools and STABFAST™ stabilization systems.

A part of the equipment kit of a fire engine is required to undergo a regular inspection and approval. We can provide all of this. For each approved or inspected part you will receive a certificate or test report from us. This way you can show everyone that your people work with reliable equipment. If required we can provide this simultaneously with the maintenance of your fire engine. The main advantage for you is that your fire engines and equipment do not have to be presented to different authorities at different times.

FIRE FIGHTING EQUIPMENT

Fire fighting equipment ▶ [Rental](#)

Rental

In addition to the rental of fire engines equipped with equipment kits, we also rent out separate fire materials, such as low pressure hoses, hand-line nozzles, monitors and manifolds. Or a complete equipment kit for a fire engine or rescue vehicle.

We also have all kinds of personal protective equipment for rental on the shelf. From breathing apparatus to helmet and from fire fighting suit to boots. We also have a fully equipped compressed air workshop with a filling station for 200 and 300 bar cylinders.

In most cases the material can be hired with qualified operating personnel. This could be a driver / pump operator, firemen for repressive services and after burning extinguishing activities. The 'supplying' of our operating personnel has a lot of added value. We therefore only deploy national certified fire-fighters (whom in most case also are in possession of the national certificate Pump operator). They always have relevant experience and the appropriate papers which are imposed by law on the operating of the equipment concerned.

Vehicles

Kenbri Fire Fighting can supply all conceivable fire trucks. Kenbri is the eminent partner for customized design and construction. From hose vehicle to industrial vehicle combination.

We can take care of all the preventive and corrective maintenance of all your fire engines for your. This applies to both the firefighting technical and the vehicle technical maintenance side. You can also contact us for the rental of almost any type of fire vehicle, such as a fire engine, rescue vehicle, a crash tender or a hooklift vehicle. If necessary it can be hired with the associated services, such as a driver, fireman, mechanic / operator, safety inspector or instructor.

Sales

With its own engineering department and years of expertise, Kenbri is the eminent partner for customized design and construction. From hose vehicle to industrial vehicle combination.

Service

As fire brigade you should always be able to trust your response vehicle and equipment. It is therefore important that your fire engines are well maintained and your equipment is periodically inspected, in order to avoid unpleasant surprises.

Kenbri Fire Fighting can accommodate the overall preventive and corrective maintenance of all your fire engines. This applies to both the fire fighting technical and the vehicle technical maintenance side. We execute everything with care and based on detailed inspection lists. With our fully equipped service vans, it is possible for our service technician to come to your location. In case of emergencies we offer a 24 hour availability, 7 days a week.

If required, in addition to the maintenance we can also simultaneously inspect and approve the equipment kit of your TS and / or HV which by law has to undergo annual inspections. In this way we make it easier for you in terms of logistics and organization and we thereby also reduce the number of days per year that your vehicles and equipment are out of commission. At your request we can provide a replacement vehicle.

Our inspection system to perform periodic safety inspections of tank vehicle sprayers, motor sprayer trailers, emergency vehicles, aerial platforms, car ladders and equipment kits, complies to the requirements of the AMTeK Fire brigade system of Aboma + Keboma.

Our mobile pump test unit can easily be used at your site. The unit is equipped with digital flow and pressure gauges, which are calibrated annually.

Rental

We have several fire engines for rental. They are all equipped with a equipment kit for fire fighting and can thus be used directly as a first response vehicle. If desired, they can be supplied with light rescue tools, breathing apparatus or without an equipment kit. We also rent out HV vehicles, foam extinguishing vehicles, hook lift vehicles, transportation vehicles, crash tenders, OVD vehicles and MSA's.

In most case the equipment can be hired with qualified operating personnel. This could be a driver / pump operator or a driver for fire pumps. The supplying of our operating personnel has a lot of added value. We therefore only deploy national certified fire fighters, whom in most case also are in possession of the national certificate Pump operator. They always have relevant experience and the appropriate papers which are imposed by law on the operating of the equipment concerned.
